EDUCATION

Bachelors (B.Sc) in Computer Science
IQRA UNIVERSITY

WORK EXPERIENCE

Frontend Developer
360xpertSolutions

03/2024 - 02/2025

Achievements/Tasks

- Collaborated with the team and stakeholders to understand project requirements and build functional React-based solutions, and essential UI features.
- Assisted in designing and developing responsive web applications using HTML5, CSS3, JavaScript, and modern frontend frameworks.
- Contributed to code quality through reviews, debugging, and team discussions, and worked with RESTful APIs for smooth data integration.
- Wrote clean, organized, and reusable code to ensure easy maintenance and future updates.
- Worked closely with seniors to enhance UI/UX, fix issues, and implement new features as part of ongoing project improvements.

Frontend Developer
NEXUS

02/2023 - 11/2023

Achievements/Tasks

- Assist in building and updating web pages using HTML for structure and CSS for styling.
- Help fix layout issues, improve responsiveness, and maintain clean UI design using CSS.
- Work on basic JavaScript tasks such as DOM manipulation, form validation, and adding interactive elements.
- Support React development by creating small components, handling props/state, and updating UI based on project needs.

PERSONAL PROJECTS

Spot Tracker (07/2024 - 10/2024)

- Built a full frontend interface using HTML, CSS, JavaScript, and React, with a fully functional live chat feature.
- Implemented responsive UI components in React, ensuring smooth user interaction and real-time updates.
- Developed a backend using Node.js, handling chat message storage and server-side functionality.
- Integrated MongoDB to save user chats properly, ensuring data persistence and efficient retrieval.

Nexcent Web App (05/2024 - 06/2024)

- Built a full frontend interface using HTML, CSS, JavaScript, and React, with a fully functional live chat feature.
- Implemented responsive UI components in React, ensuring smooth user interaction and real-time updates.
- Implemented secure login and signup functionality with proper form validation and error handling.

Fitness Mob App (02/2022 - 06/2022)

- Designed and developed the complete frontend UI of the Fitness Mobile App using modern design principles.
- Created clean, responsive, and user-friendly workout screens, dashboards, and progress pages.
- Implemented smooth navigation and screen transitions for a seamless user experience.
- Added interactive UI components such as buttons, forms, and workout cards to enhance usability.

Mobile Market System (02/2021 - 05/2021)

- Developed using Java to demonstrate fundamental object-oriented programming concepts such as classes, objects, inheritance, and methods.
- Implemented user input handling to allow customers to select mobile models, check prices, and proceed with purchases.
- Designed a basic billing system that calculates total cost, applies quantities, and generates a simple invoice.
